

## Applying Geography Skills: Analyzing a Flow Map

Use the map and your knowledge of geography to complete the tasks below.

### Migration Streams Around the World

This map shows migrations streams around the world.

1. Circle one arrow on the map. Describe where it begins and where it ends. Tell what the arrow represents. Use the map legend to help you.
2. Identify two push factors shown on the map.
3. Identify one pull factor shown on the map.
4. Determine which region received the most migration streams. Did this region receive the most immigrants? Explain your answer.

#### Test Terms Glossary

To explain means to give reasons for something.
